

aris™

Architectural Interface System

Leprecon®
Lighting for Professionals

These days it's all about integration. Having the proper tools and the flexibility to adapt to the latest technology is key to a successful lighting installation. Understanding this led to the development of aris™...an elegant control system for architectural and theatrical lighting needs.

aris™ consists of the AI-512 and optional control surfaces to give you complete control at your finger tips. Housed in 2ru rack mount chassis, the AI-512 contains all the necessary hardware and software to interface with and control any DMX lighting system. All 512 DMX channels can be used for architectural or stage lighting and easily recalled from a number of different interfaces such as our aris™ wall stations, any DMX console, or aris™ Ethernet stations, including our exclusive 15 inch integrated touch computer.

When faced with the challenge of creating the ideal lighting environment, there is a solution. The aris™ Architectural Interface System puts all your lighting control at your fingertips.

aris™ System Components

AI-512 Interface Unit

The AI-512 is at the heart of the aris system. With the AI-512 any DMX system can be controlled through a DMX console, aris wall stations or our aris Ethernet stations. The AI-512 has all the necessary hardware and software needed to program up to 8 different rooms and 24 playbacks per room.

AI-512 and AI-512-AF Hardware:

- DMX In—5 pin XLR
- arisNet In/Out – 2 ports, RJ45
- DMX Out (DMX In merged with scene data) —5 pin XLR
- USB port—Show file storage
- Ethernet connection—1 port, RJ45
- Connects to PC for programming or optional Ethernet stations
- Power supply input, +12VDC

AI-512 Software:

- DMX snapshots for quick programming
- Control all 512 DMX channels
- Live / Blind record modes
- Uses any Web browser as the programming interface
- Real time status display
- Astronomical clock event triggers
- DMX mapping of scene playbacks or lockout function to desk channels
- Compact Flash storage

AI-512-AF Software:

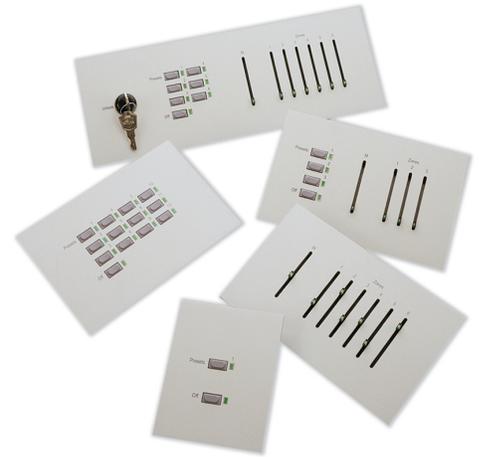

Includes all AI-512 software features plus:

- User settable IP address
- aris Touch software application for use with any PC

aris Wall Stations

The aris wall stations offer a flexible modular design to fit your specific needs. Choose from preset button panels, fader panels or combination panels. The panels come with output level LED indicators and low profile faders and buttons. Each panel is daisy chained with arisNet using standard CAT 5 cable and RJ45 plugs.

All faceplates are aluminum and finished in a durable baked on enamel. The color is a neutral, off-white with unobtrusive warm gray graphics. The Raco 690 Series electrical boxes are recommended for mounting aris wall panels.

aris Ethernet Stations

The aris™ Ethernet stations provide the same flexibility and modular design as our wall stations, but also gives the user a true graphical interface. Each station is connected via Ethernet to the AI-512 controller. The aris™ Ethernet stations are available in various models, including 15 inch integrated touch computer.

aris Touch application

The aris Touch application provides an eye catching, user friendly interface screen. Just download the software to your PC and drag and drop any photo or graphic image onto a playback button. Now you're ready to recall any of the playbacks simply by clicking or touching the icon. Other features include:

- Create up to 8 room tabs with 24 playbacks per room
- Upload graphic image files for identifying playbacks
- Name playbacks
- Simple set-up
- PC based

aris Ordering Information

AI-512 Interface Unit

Model Number	Description
90-03-5602	AI-512 Unit w/software & power supply
90-03-5603	AI-512-AF Unit w/software & power supply
40-03-5616	AI-512, Stand alone power supply, replacement
40-03-5603	AF license and aris Touch application for AI-512

aris Wall Stations

Model Number	Description	Inside Gang Size	Outside Panel Size
90-03-6101	Lockout, Keyswitch Panel	1 Gang	2 Gang
90-03-6103	1P, 1 Button Preset w/Off	1 Gang	2 Gang
90-03-6104	3P, 3 Button Preset w/Off	1 Gang	2 Gang
90-03-6106	6P, 6 Button Preset w/Off	2 Gang	3 Gang
90-03-6108	12P, 12 Button Preset w/Off	3 Gang	4 Gang
90-03-6110	3P/3F, 3 Button Preset, 3 Fader	3 Gang	4 Gang
90-03-6111	3P/3F/LO, 3 Button Preset, 3 Fader & Lockout	4 Gang	5 Gang
90-03-6112	6P/6F, 6 Button Preset, 6 Fader	5 Gang	6 Gang
90-03-6113	6P/6F/LO, 6 Button Preset, 6 Fader & Lockout	6 Gang	7 Gang
90-03-6114	1F, 1 Fader w/Master	1 Gang	2 Gang
90-03-6115	3F, 3 Fader w/Master	2 Gang	3 Gang
90-03-6116	6F, 6 Fader w/Master	3 Gang	4 Gang
90-03-6117	12F, 12 Fader w/Master	5 Gang	6 Gang

Use Racco 690 Series electrical boxes.

Use the "Inside Gang Size" for individual panels.

To determine "Inside Gang Size" when using multiple panel combinations, total the "Outside Panel Size" of each panel and subtract 1 gang.

Wall Station depth = 2.50 inches
